Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Duley et al. (US Pat. 6,426,153) in view of Durand (US Pat. 5,966,813).

Duley et al. discloses a tailored blank, which is used in a vehicle frame. The blank is constructed of sheet metal parts (mild steel, aluminum and so forth) welded together. Although laser welding is preferred, alternative welding techniques may be used. Figures show the different types of blank construction, that is, lengthwise and perimeter wise. (abstract, figures, col. 1, lines 19-67, col. 2, lines 1-7, col. 4, lines 62-67, col. 5, lines 45-50, col. 6, lines 33-54)

Duley et al. does not teach the use of magnetic pulse welding.

Durand discloses joining dissimilar materials bonded by magnetic pulse welding to form a vehicle frame component. Figures show that the two-component construction is secured in a perimeter fashion. (abstract, figures, col. 1, lines 63-67, col. 2, lines 1-13, col. 4, lines 59-67, col. 5, lines 1-28)

Art Unit: 1725

It would have been obvious to one of ordinary skill in the art at the time of the invention to use magnetic pulse welding as taught by Durand in the Duley et al. system because this is merely an alternative welding technique.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-16 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1725

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
